Bern, October 11, 2017

Dear Colleagues, Dear Pastors,
Dear Health Ministries Directors and Directors of other Departments,
Dear Church Members,

As the unwearied servant of men's necessities, Jesus was going through cities and villages caring for each, healing the afflicted ones and testifying of His Father's love. Today for us, the calling is the same: to comfort all who mourn, to bind up the broken-hearted, to minister to the sick, and to share hope with all.

The 2nd European Health Conference on ***“Reversing Diseases with Lifestyle Medicine, Sharing Health, Healing, and Hope”*** is a unique occasion to be educated, equipped and empowered to advance the mission of Jesus in Europe.

Lifestyle Medicine - a tool long-known within our Church - is now an emerging field of medicine. The therapeutic use of lifestyle interventions has been researched, evidenced, implemented and is changing lives. The Conference will deal with topics such as: reversing obesity or type 2 diabetes, lifestyle medicine in oncology, reversing the progression of dementia, exercise prescription, paradigm shift in psychiatry, behavior change and many other medical as well as spiritual topics.

Whether you are a medical professional, a church or institution administrator, a pastor or a member, who wants to serve his/her community, this event is for you.

I look forward to seeing you in Bucharest from April 17-21, 2018.

Valérie Dufour
Director, EUD Health Department
